META-META Club

WORKBOOK · MODULE 2 OF 4

Weeks 1–3 · Skills sprints

Client Studio. Sprints chosen from the pro-studio modules.

Fellowship | 1 lessons | ~3 h | 3-question practice quiz | Notes pages

IN THIS MODULE

Weeks 1–3 · Skills sprints

Sprints chosen from the pro-studio modules.

#	LESSON	TYPE	TIME	DONE
2.1	Skills sprint	LAB	180 min	☐

How to use this workbook

- Work through each lesson on metametaclub.com/learn, or listen to its narration, then use the page here to take notes.
- Tick the steps as you go, and write your answers under **Check yourself** before you look anything up.
- Do the practice quiz at the end, then mark it with the answer key on the last pages.
- Keep every **Ship it** piece. Together they become what you show.

Before you start

What do you already know about this, and what do you want to be able to make by the end?

LESSON 2.1 · LAB · 180 MIN

Skills sprint

Pick the pro-studio modules your brief needs most, plan a short sprint for each, and finish every sprint with a small demo. A sprint block like this runs each week for three weeks.

Key points

Pick against the brief, not your wishlist

The pro studios are Agent-Built 3D, XR for the Built Environment, Browser Worlds, Large Scenes and Cinematic Fly-throughs, and African Culture in Immersive Space. Each module in them ends in a small piece.

Ask one question: **what will we have to build in week 5 that nobody on the team can build today?** That gap is your sprint.

Examples:

Sprint shape

One sprint is one module, about a week. It has four parts:

1. **Goal:** the one thing you'll be able to do at the end.
2. **Build:** work through the module lessons and its build-along.
3. **Apply:** make a tiny version of something your brief needs.
4. **Demo:** show it in under three minutes.

Common traps

- Picking a sprint because it looks fun, not because the brief needs it.
- Finishing the lessons but skipping the apply piece. The apply piece is the point.
- Polishing. Sprints are for learning fast. Polish comes in Client Studio.

Steps checklist

- [ ] List the three hardest things your brief will ask for.
- [ ] Map each one to a pro-studio module. Drop anything the team can already do.
- [ ] Write a sprint plan with the template below. Keep it to three sprints, one per week.
- [ ] Work the first sprint. Commit your files to the project folder every day.
- [ ] Record a short screen capture of your apply piece.
- [ ] Demo at the end-of-week crit.

```
This lesson has code samples. They are printed in full in the lab handout (client-studio-lab-2-1.pdf)
and in the lesson on metametaclub.com/learn.
```

SHIP IT

Post your sprint plan, then one apply piece per week: a render, a running link or a short clip, with one line on what it proves for your brief.

☐ Shipped. Link or file: _____

Check yourself

1. Does every sprint close a real gap your brief will expose?

2. Could you demo this week's apply piece in under three minutes?

3. Is your work committed to the shared project folder, not only on your laptop?

PRACTICE QUIZ

Check your module

Circle one answer for each question. The answer key is on the next page.

1. How should you choose your skills sprints?

(A) Take every pro-studio module in order
(B) Pick the modules that close the gap between your team and your brief
(C) Pick whatever looks most fun
(D) Let the newest tool decide

2. Which part of a sprint matters most for your brief?

(A) The goal line
(B) Watching the lessons
(C) The apply piece
(D) Polishing the demo

3. How long should a sprint demo take?

(A) Under three minutes
(B) Fifteen minutes
(C) An hour
(D) There is no demo

ANSWER KEY

Answers and why

1 · B Pick the modules that close the gap between your team and your brief

Sprints exist to close the specific gaps your brief will expose in Client Studio.

2 · C The apply piece

The apply piece is a tiny version of what the brief needs. It turns learning into proof.

3 · A Under three minutes

Short demos keep crits moving and force you to show only what matters.
